POWER WORDS CHEATSHEET

If there's one thing every copywriter knows – it's that being able to **capture the attention** of an overstimulated internet scroller is HALF the battle. I mean let's face it, we copywriters are in the business of attention and retention first and foremost.

So it pays to put a little extra thought and effort into making sure you can effectively HOOK attention with your copy...

And one of my absolute *favorite* (and easiest) ways to do this is through using language that I like to call POWER WORDS.

So what exactly *are* Power Words?

Well, simply put: Power Words are words that you *don't* see used very often. Whereas certain words like – "huge", "top", "best", and "great – we see being used ALL of the time.

These *basic words* are overused so much in copywriting, content writing, and well – all writing, really – that they begin to lose impact. Readers sort of just glaze right over the word without really taking the time to consider the meaning or reference.

Power Words, on the other hand...

Are much more *descriptive* and *thought-provoking* in nature, making them way more likely to **capture attention** and **spark curiosity** in your audience than using "basic" or overused language.

So... let's spice up your drab and dreary copy into something fabulously gripping, shall we? Here's the Posse's go-to list of **over 250 Power Words** to get your creative juices flowing

And be sure to **follow me on Instagram** for even more Power Word posts and exercises!

POWER WORDS CHEATSHEET

There you have it! Over 250 Power Words to make your copywriting **extra spicy** and captivating AF.

But a word of caution...

USE THIS CHEATSHEET RESPONSIBLY.

Don't try to jam-pack your writing with as many Power Words as humanly possible. Because here's the thing. Power Words pack a BIG PUNCH. They're meant to be used *wisely* and *sparingly*.

Remember that you don't want to fill your copy with a bunch of fancy, complex, "I'm-trying-to-hard" language.

You want your copy to flow **easily**, **effortlessly**, and be **simple to digest** for your readers.

So when applying Power Words to your writing, remember to be strategic with your choices.

Some of the best and most effective places you can think about adding Power Words are in your subject-lines, headlines, section transitions, benefits and just before your call-to-actions.

In my experience, these are the most important places to make sure your copy is leaving a BIG impact on the reader.

Because remember, what's the point of capturing your reader's attention in the first place?

It's not to impress (or confuse) your reader with fancy language and big words...
